EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Reza Mollaaghababa on May 1, 2008.

The application has been amended as follows:

The first paragraph of the specification is replaced by the following to add status of previous applications:

[01] This Application claim the benefit of priority to U.S. Provisional Application Serial Nos. 60/446,300, filed February 10, 2003 entitled "Light Emitting Toothbrush and Method of Its Application for Oral Bacteria Reduction and Periodontal Disease and Caries Lesion Treatment and Prevention;" 60/446,342, filed February 10, 2003 entitled "Light Emitting Toothbrush and Method of Its Application for Tooth Whitening and Brightening;" 60/449,188, filed February 21, 2003 entitled "Method and Apparatus for Rejuvenation of Hard and Soft Oral Tissue and Perioral Facial Skin and for Prevention and Healing of Diseases Thereof;" and claim priority as a continuation-in-part to U.S. Utility Application Serial Nos. 10/680,705, filed October 7, 2003 entitled "Methods and Apparatus for Performing Photobiostimulation", now abandoned, and 10/702,104, filed November 4, 2003 entitled "Methods and Apparatus for Delivering Low Power Optical Treatments," which is a continuation-in-part of 09/996,662, filed November 29, 2001 entitled "Methods and Apparatus for Controlling the Temperature of a Surface", now U.S. Patent 6,648,904.

In the claims:

Claims 17 and 19 have been cancelled.

The following is an examiner's statement of reasons for allowance: The prior art does not disclose or fairly suggest a radiation emitting device wherein the radiation is optically coupled to and emitted via shaped bristles so as to irradiate within an oral cavity and the device further comprises a thermally conductive element for extracting heat from the radiation emitter. U.S. Patent 6,862,771 teaches irradiation of an oral cavity via bristles and U.S. Patent Application Publication US 2003/0163884 teaches various shapes of bristles optically coupled to a radiation source, however, neither teach the removal of the heat produced by the emitter with a thermally conductive device and fluid transfer medium.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Henry M. Johnson, III whose telephone number is (571) 272-4768. The examiner can normally be reached on Monday through Friday from 5:30 AM to 2:00 PM.
